## KIRBY CABINET COOLERS

Application Range:

Low Temperature 0.6kW - 1.7kW\*

Medium/High Temperature 0.3kW - 2.3kW\*

- Removable, discreet drain tray (housing) which is easily removed for cleaning and service.
- Heat exchanger with rifled bore tubing for high performance and exceptional oil return (KC & KCT Series).
- E-Kote coil protection.
- Dual Discharge option available (KCT Range).

Note: The Cabinet and Reach In coolers are optimised for performance to ensure the footprint of the unit remains compact. The low profile design increases shelf and retail display space.

PAGE 6

## KIRBY TA EVAPORATORS

Application Range:

Medium/High Temperature 4kW - 16kW

- High efficiency coil includes corrugated aluminium fins and grooved internal copper tubes, low velocity air discharge.
- Intelligent housing design and drainage offers for superior drainage and hygienic performance.
- The hinged drain pan offers improved accessibility to all the components and the housing is designed to accommodate installation of a condensate pump.
- Glycol application available.

Note: The casing with integrated fan guards offers improved aesthetics, perfect for open food preparation areas unit remains compact.

PAGE 8

## KIRBY 9000 SERIES EVAPORATORS

Application Range:

Low Temperature 1.2kW - 13.6kW

Medium/High Temperature 1.3kW - 19.8kW

The front facing quick connect terminal board simplifies wiring for faster install and servicing.

- Face heaters allow easy access for maintenance/replacement.
- Extended model and capacity range with low frost, heater assisted defrost and EC fan configuration models available.
- Separate panels for refrigeration/electrical connections (opp. ends).
- CO<sub>2</sub> coil circuiting part of the 9000 Series (KLC/KMC).
- Glycol application models available.

PAGE 9

## BUFFALO TRIDENT CO<sub>2</sub> EVAPORATORS

Application Range:

Low Temperature 1.55kw - 6.5kw

Medium /High Temperature 1.62kw - 7.1kw

- Internal ripple finned tube for higher heat transfer performance.
- No condensation formation with thermally decoupled defrost tray.
- Max operating pressure 80 bar.

Buffalo Trident

BY BITZER GROUP

PAGE 13

## KIRBY NULLARBOR CONDENSING UNITS

Application Range:

Low Temperature 0.3kW - 2.3kW

Medium/High Temperature 0.4kW - 4.9kW

- Condensers selections provide assured operation at 45°C ambient and enhance the life of the compressor.
- WJ/AW series include liquid line drier, sight glass and HP/LP control.
- Selected unit models are provided complete with a condensate waste tray and discharge heat loop for efficient condensate waste removal.

PAGE 15

## EASY PACK CONDENSING UNITS

Application Range:

Low Temperature 1.4kw - 5.2kw

Medium /High Temperature 2.0kw - 13.0kw

- Condenser Selections provide for 10k split at 30°C ambient.
- Include HP/LP control, dryer & sight glass, liquid line solenoid valve.
- Crankcase heater.
- Pressure relief valve fitted,
- Suction accumulator – all models,
- Oil separator – low temp models.

Tecumseh

PAGE 21

## KIRBY POLAR PACK HERMETIC CONDENSING UNITS

Application Range:

Low Temperature 1.3kW - 6.0 kW

Medium/High Temperature 2.7 kW - 11.0 kW

- Fully pre-wired including condenser fan speed control as well as motor and phase failure protection.
- The package supports fast installation, express commissioning and easy servicing.
- Kirby Blue Kote Protection to condenser coil.
- Include crankcase heater, oil separator, liquid line dryer and sight glass, HP/LP control.
- Suction accumulator fitted to low temp units.

PAGE 25

Note: Condenser fan speed control is standard and controlled by condensing pressure. Select units can be supplied in horizontal airflow configuration allowing flexibility in installation location.

## KIRBY TITAN HERMETIC CONDENSING UNITS

Application Range:

Low Temperature 4.9kW - 12.6kW

Medium/High Temperature 12.6kW - 28.6kW

- Maneurop Hermetic Compressors.
- Fully pre-wired including, condenser fan speed control plus motor and phase failure protection (fan speed controlled by condensing pressures).
- Includes oil separator, liquid line dryer & sight glass, HP/LP control.
- Kirby Blue Kote Protection to condenser coil.

PAGE 32

## TECUMSEH PAC<sup>3</sup> CONDENSING UNITS

Fitted with either reciprocating or scroll compressor technology, optimised for space constrained landscapes.

Application Range:

Low Temperature 1.2kw - 5.6kw

Medium Temperature 2.0kw - 13.3kw.

- Configured for horizontal air flow.
- Fully pre-wired including condenser fan speed control.
- Fitted with crankcase heater, liquid line dryer & sightglass.
- HP/ LP control.
- Suction accumulator and oil separator.

PAGE 35

## KIRBY CONTAINER PACK CONDENSING UNITS

Application Range:

Low Temperature 3.3kW

Medium/High Temperature 6.0kW

- Incorporating single phase Maneurop compressors delivering reliability and proven performance.
- Fully wired with isolator, contactors, and circuit breaker - no temperature controller.
- High ambient vertical discharge condenser optimises efficiency and airflow for continuous operation at temperatures up to 45°C ambient temperatures.
- Durable painted galvabond bases maximise service life.
- Single unit offering both Medium and Low temperature capable.
- Premium quality inclusions and controls.
- Units include liquid line dryer, sight glass and HP/LP and liquid line solenoid valve.
- Suction Accumulator & Oil Separator.
- Suitable for R134A, R404A, R449A, R407F.

PAGE 39

**BITZER ECOLITE SEMI HERMETIC CONDENSING UNITS**

Wide range ECOLITE compressors for low or medium temperature application as standard.

Application Range:

Low Temperature 3.7kw – 8.9kw

Medium Temperature 7.9kw – 18.4kw.

- Horizontal Air Flow.
- HP/LP Control.
- Oil Separator.
- Liquid line dryer & sight glass.
- CRII capacity modulation and start unloader function.
- Pre-wired to include optimised condenser fan speed control (high side pressure reference).

PAGE 40

**KIRBY KRC REMOTE CONDENSERS**

Application Range:

R404A 0.8kW - 17kW @ 1KTD R134a 0.7kW - 16kW @ 1KTD

- Optimised coil design incorporating inner grooved tube for enhanced heat transfer.
- Kirby Blue Koted fins for optimal UV protection and corrosion resistance.
- Header clearance holes ensure the end/divider plates prevent premature fatigue, failure and/or leaks.
- Powder coated galvanised casing for extended life.
- Dry cooler application available.

PAGE 42

**GREEN & COOL TRANSCRITICAL CONDENSING UNITS**

A basic cost effective natural refrigerant condensing unit.

Application Range:

Low Temperature 2.2kw – 4.9kw (nominal)

Medium Temperature 2.0kw – 6.7kw (nominal)

- Fitted with user friendly intelligent control system.
- 89 bar rated.

TBA

## Kirby® Cabinet Cooler Evaporators

### Overview and introduction

With a smart and aesthetically pleasing design, Kirby® Cabinet Coolers deliver the perfect combination of additional storage space and greater refrigerated storage capability.

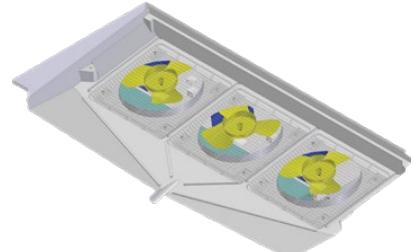

Offering long life and superior reliability that just keeps going, medium temperature models also feature E-Kote coil protection on all essential components including the copper, to safeguard against corrosion from airborne food acids. For larger medium temperature applications, twin air blowers deliver consistent and even air flow around the inside of the cabinet.

### Features and Benefits

#### Medium Temperature Models:

- Compact, low profile design which gives more shelf space.
- Slim, neat profile for maximum cabinet storage space.
- Removable, discreet drain tray which is easily removed for cleaning and service.
- Heat exchanger with rifled bore tubing for high performance and exceptional oil return.
- Fan motors which can be easily removed for servicing.
- E-Kote coil protection for protection against the elements.
- Larger capacity twin blower coolers, suitable for larger sized cabinets.
- Suitable for high and medium temperature applications where a defrost heater is not required.

#### Low Temperature Models:

- Compact, low profile design which gives more shelf space.
- Slim, neat profile for maximum cabinet storage space.
- Removable, discreet drain tray which is easily removed for cleaning and service.
- Storage temperature capacity down to -32°C.
- In-built controls terminate the defrost cycle when required temperatures are reached.

# Kirby® TA Evaporators

## Overview and introduction

The twin air flow TA unit coolers with direct expansion or glycol water coils are designed for installation in cold rooms, air locks, laboratories, meat cutting and packing rooms, etc

## Features and Benefits

- High efficiency coil includes corrugated aluminum fins and grooved internal copper tubes, low velocity air discharge.
- Intelligent housing design and drainage offers for superior drainage and hygienic performance.
- The hinged drain pan offers improved accessibility to all the components and the housing is designed to accommodate installation of a condensate pump.
- Glycol application available.
- The casing with integrated fan guards offers improved aesthetics, perfect for open food preparation areas.

# Kirby® 9000 Evaporators

## Overview and Introduction

The Kirby® 9000 Series Evaporator has been specifically designed to overcome the usual limitations of a typical compact coil design. This low frost innovation uses a unique fin pattern to minimise latent load and maximise sensible load. Enhanced fin configuration means less moisture removal and vastly improved run times before ice formation.

By increasing the ratio of fin surface to tube surface, the Kirby 9000 Series Evaporator maintains airflow as ice builds up and the coil is able to hold ice for longer. The result is more stable room conditions and longer time between defrosts as well as greater energy efficiency.

## Market Segments

- Retail
- Cold storage
- Convenience
- Hospitality
- Process
- Industry

## Features and Benefits

The Kirby® 9000 Series Evaporator offers:

- Simplified installation including factory wiring on all models for fans and heaters (excludes controls).
- High airflow from the latest generation fan assemblies ensures efficient pull down and air throw.
- Front opening access to electrical panel and separate panel for refrigeration components for ease of service.
- Face heaters allow easy access for maintenance and replacement.
- A supporting spare parts range accessible 24/7 through the Realcold wholesale network.

## Optional Enhancements

Kirby® 9000 Series can be configured with the following options:

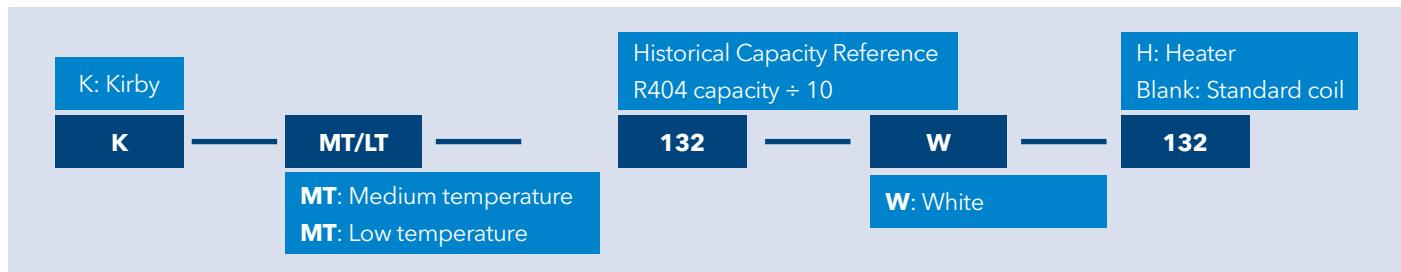

- Special circuiting to suit glycol, CO<sub>2</sub>, water, split circuit and special operating conditions
- Expansion valves fitted
- EC fan motors
- Electric defrost for medium temperature models
- Air straightener

KEY CHART

	Extended life		Sustainable solution
	Installation cost/time saving		Improved performance
	Improved efficiency		Flexible application

# Buffalo Trident CO<sub>2</sub> Evaporators

 **Buffalo Trident**  
BY BITZER GROUP

## Overview and Introduction

The constant push for smaller, cheaper, quieter and better performing equipment is at the forefront of design. To achieve these goals, BUFFALO TRIDENT employs a host of strategies to achieve a delicate balance between performance, size and noise levels. Innovative technologies and modern design means our evaporators set the standards in engineering excellence, flexibility and reliability. Gains come from using smaller tube designs, in combination with high efficiency EC fans and economic superheat control solutions. Our evaporators are available in a multitude of configurations and are therefore suitable for a wide range of customer specifications.

## Features and Benefits

- Natural refrigerant - environmentally safe and non-toxic.
- Internal ripple finned tube for higher heat transfer performance.
- No condensation formation with thermally-decoupled tray.
- Max operating pressure up to 80 bar (CX-units).

## R744 (CO<sub>2</sub>) EVAPORATORS - MEDIUM TEMP

Conditions: Evap Temp: -4°C, Air Temp: 2°C, Cond Temp: 6°C, SC: 1K, SH: 5K

# Kirby® Nullarbor Condensing Units

## Overview and Introduction

The Nullabor Hi-Ambient condensing units are rated for operation up to 45°C ambient. With improved performance due to the inclusion of large condensers, the Kirby Nullarbor range delivers high output and efficiency. Additionally because they're from Kirby, they're robust and reliable - guaranteed.

## Market Segments

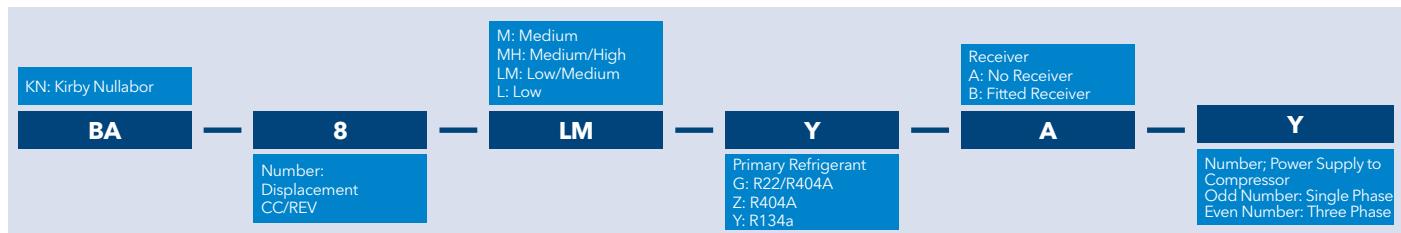

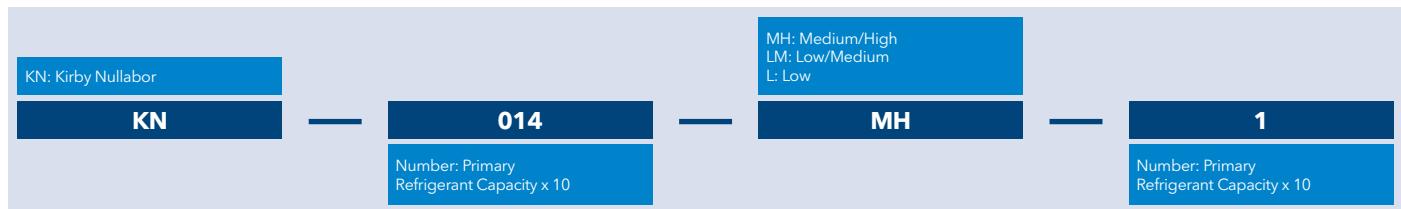

- Retail
- Hospitality
- Institutional
- Light Industrial

## Features and Benefits

The Nullabor Condensing Units offer proven design attributes to be installation ready:

- Incorporating the latest Kirby BA, WJ and AW series compressors that delivers reliability and proven performance.
- High ambient condenser optimises efficiency and airflow for continuous operation at temperatures up to 45°C ambient temperatures.
- Durable painted galvabond bases maximise service life.
- Lower noise and vibration levels through clever compressor design.
- Compact footprint for ease of installation.
- Premium quality inclusions and controls.
- KN units include liquid line dryer, sight glass and HP/LP control.

# EasyPack Hermetic Condensing Units

## Overview and Introduction

The Easypack series of hermetic refrigeration condensing units provide a high quality professional solution for all commercial refrigeration applications. Common applications include cabinets, cool rooms, freezers, convenience stores, restaurants, pubs and clubs, food processing and many more.

## Features and Benefits

- Tecumseh Hermetic compressor.
- Large HTA condenser.
- Factory wired single phase fan motor/s.
- Liquid receiver.
- Pressure Relief valve.
- Liquid line dryer / sight glass/ solenoid valve.
- Suction Accumulator - all models.
- Oil Separator - Low temperature models.
- HP/LP control.
- Oil sight glass on FH, TFH and TAG models.
- Crankcase heater on FH, TFH and TAG models.

## Application Range:

**Low Temp - 1.4Kw - 5.3Kw**

**Med Temp - 2.2Kw - 13.0 Kw**

# Kirby® Polar Pack Condensing Units

## Overview and Introduction

Compact and robust, our Polar Pack Series III commercial refrigeration unit is specially designed for harsh ambient conditions.

Pre-wired and constructed around a small base, Polar Pack is easy to install.

Kirby's outdoor condensing units have always been renowned for their durability and clever design. The Polar Pack is no exception. Being a fully enclosed system, it can be installed indoors or outside.

## Features and Benefits

The Polar Pack Condensing Units offer proven design attributes to be installation ready:

- Wide model range between 1.3Kw and 11.0kW.
- True high ambient condenser design, with operating capacity up to 45°C.
- Removable panels for ease of servicing.
- Factory pre-wired for quicker, easier installation and commissioning.
- Phase failure protection module.
- Coil protection as standard on all models.
- Powder coated exterior for long wearing durability.
- Suction accumulator as standard on all low temperature models.
- Kirby® Polar Pack condensing units can be configured with the following options: Horizontal airflow on select models.

## KIRBY POLAR PACK CONDENSING UNITS

### Important Notes:

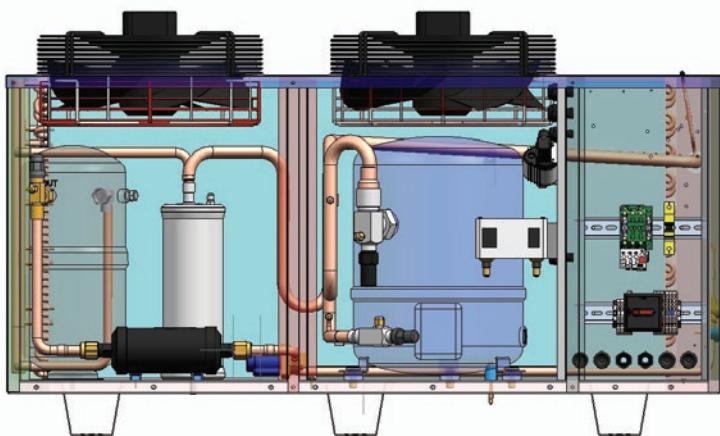

- \* It is particularly important for the units to allow sufficient unobstructed vertical air-discharge space above the unit to prevent warm air recirculation to the condenser.
- \*\* If the unit is to be located in close proximity to a wall or similar obstruction, the minimum distance from the coil face to the obstruction shall be complied with. The unit shall be mounted on a level horizontal plane surface.

## KIRBY POLAR PACK CONDENSING UNITS

# Kirby® Titan Hermetic Condensing Units

## Overview and Introduction

A tough, compact and robust commercial condensing unit, the Kirby Titan Hermetic offers impressive performance and capacity within a small footprint. Pre-wired for convenient installation, the Titan thrives in harsh ambient conditions and under heavy loads. Being a fully enclosed system, it can be installed indoors or outside.

## Features and Benefits

The Titan Hermetic Condensing Units offer proven design attributes to be installation ready:

- Widest capacity range from 4.9kW to 28.6kW.
- Suitable for use with R513a/ R134a, R449a / R040a, plus many other refrigerants.
- All standard wiring and controls are factory installed and tested.
- Fan speed control fitted as standard (EC fans are available as an option).

## Kirby Titan Hermetic Condensing Units - Nomenclature

# Tecumseh PAC<sup>3</sup> Condensing Units

Tecumseh

## Overview and Introduction

The Tecumseh Packaged PAC<sup>3</sup> Condensing Unit is designed with both reciprocating and scroll compressor technology with wide range offer. The PAC<sup>3</sup> is best in sustainability, flexibility and serviceability.

## Features and Benefits

- Reciprocating and scroll compressor offering.
- Compact and optimised for space constraints.
- Wide application range to fit extensive demands.
- Units are fully pre-wired and include: fitted crankcase heater, liquid receiver, liquid line drier & sight glass and HP/LP control.
- Suction accumulator - all models.
- Oil separator - low temperature models.

# Kirby Container Pack Condensing Units

**NEW**

## Overview and Introduction

The Container Pack single phase condensing units are rated for operation up to 45°C ambient. With improved performance due to the inclusion of large condensers, they deliver high output and efficiency. Additionally because they're from Kirby, they're robust and reliable - guaranteed.

## Features and Benefits

- Incorporating single phase Maneurop compressors delivering reliability and proven performance.
- Fully wired with isolator, contactors and circuit breaker - no temperature controller.
- High ambient vertical discharge condenser optimises efficiency and airflow for continuous operation at temperatures up to 45°C ambient temperatures.
- Durable painted galvabond bases maximise service life.
- Single unit offering both Medium and Low temperature capabilities.
- Premium quality inclusions and controls.
- Units include liquid line dryer, sight glass and solenoid valve.
- HP /LP control.
- Suction Accumulator & Oil Separator.
- Suitable for R134A, R404A, R449A, R407F.

## Suggested Evaporator

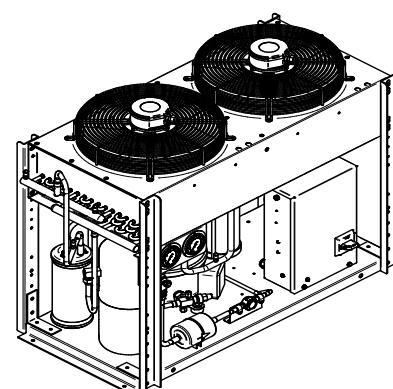

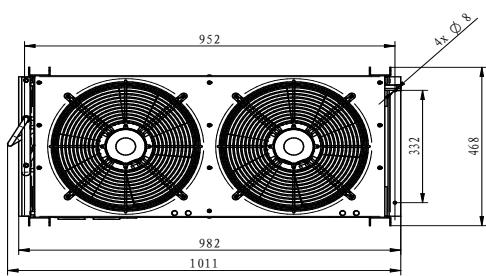

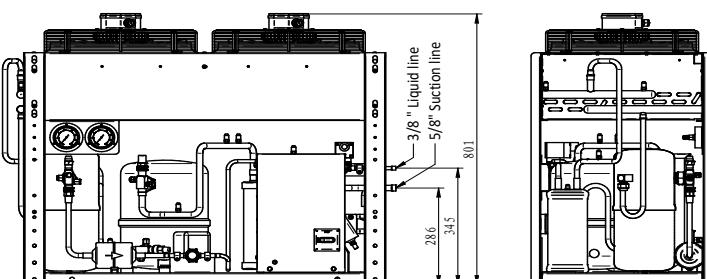

- Low Temp - KLT036W & Med Temp KMT036W.

## PERFOMANCE DATA

Ambient	SST	
	-5	-25
25	6459	3661
30	5948	3334
35	5445	3025
40	4946	2734

Watts on R404a, inherent subcooling, 20°C return gas temp.

# Bitzer Ecolite Air-Cooled Condensing Units

## Overview and introduction

The ECOLITE air-cooled condensing units for commercial refrigeration perfectly complement BITZER's proven standard LHE and premium ECOSTAR series. It is the ideal solution for cost-conscious customers who are looking for a highly flexible, sustainable and easy to install product made of approved BITZER components.

Highly efficient BITZER ECOLINE compressors with capacity control combined with system-optimized condensers and speed-controlled fans make all seven unit models suitable for low and medium temperature applications as standard.

Comprehensive equipment and a smart BITZER controller form a comfortable plug and play concept allowing simple implementation in the cooling system and constant monitoring of operating parameters and settings.

The ECOLITE series is available for all common refrigerants, including A2L flammable refrigerants R134a, R450A, R513A, R1234yf, R1234ze(E), R404A, R448A, R449A, R407A/C/F, R454C, R455A. It fully complies with the EU Ecodesign Product Regulation 2015/1095.

Due to its versatility and future-proof design, this series is a state of the art, affordable line of condensing units featuring the latest BITZER technology.

## Features and Benefits

- Horizontal Air Flow.
- HP/LP Control.
- Oil Separator.
- Liquid line dryer & sight glass.
- CRII capacity modulation and start unloader function.
- Pre-wired to include optimised condenser fan speed control (high side pressure reference).

## Comprehensive Equipment

- Liquid receiver.
- Sight glass.
- Filter dryer.
- High and low pressure switches and transmitters.
- Oil heater.
- Suction, discharge and ambient temperature sensors.
- Simple commissioning through Plug and Play concept.
- Safe for A2L refrigerants.

## Performance Data

Based on 20°C suction gas temperature with 1K liquid subcooling.  
Cooling capacity and COP at 32°C ambient temperature.  
SEPR according to EN 13215.

Rating Conditions: EN13215 at stated ambient, 20°C return gas temp & 3K Subcooling

#### Notes:

1.Units are configured for horizontal airflow.

2.Units include:

- Liquid receiver
- HP & LP control
- CRII capacity control (10% to 100% for LHL5E)

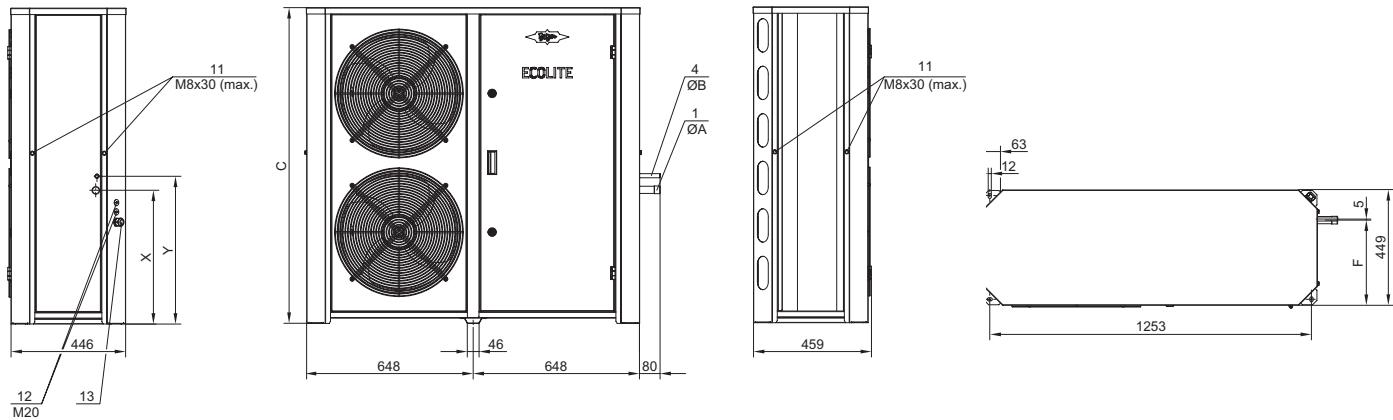

- Crankcase heater
- Oil separator
- Liquid line drier & sightglass
- Fan speed control
- Coolroom temperature sensor

#### Optional equipment:

Interface converter for connection to BEST SOFTWARE

# Kirby® KRC Remote Condensers

## Overview and Introduction

The Kirby® KRC Remote Condenser range includes the latest refrigeration technologies for upgraded performance such as 9000 series fin coils and pre coated fin for optimal corrosion protection. The units can be installed vertically or horizontally for maximum flexibility.

Standard inclusions include powder coated panels and quality external rotor motor fans for long life and serviceability. For variable capacity and noise sensitive applications, Kirby offer "easy to adapt" solutions.

## Market Segments

- Retail
- Convenience
- Cold Storage
- Hospitality
- Primary Producers
- Industrial
- HVAC

## Features and Benefits

The Kirby® KRC Remote Condenser offers:

- Optimised air flow and coil design for enhanced heat transfer performance and high pressure applications.
- 240V - 1 Phase fan motor assemblies.
- Kirby Blue Koted aluminium fins for optimal UV and corrosion resistance.
- Header clearance holes to ensure the end/divider plates remain a leak free zone and positive air seal between all fans.
- A supporting spare parts range accessible 24/7 through the Realcold wholesale network.

## Optional Enhancements

Kirby® KRC Remote Condensers can be configured with the following options:

- EC fan with Orbus™ fan speed control
- 3 Phase fan assemblies - 500mm and 630mm dia
- Fan motors pre-wired to terminal junction box
- Special Applications on request - Sub Cooling Circuit, Multiple Circuits, Dry Cooler, Oil Cooler, Fluid Cooler.

KEY CHART

	Extended life		Sustainable solution
	Installation cost/time saving		Improved performance
	Improved efficiency		Flexible application

## KIRBY KRC REMOTE CONDENSERS

### R449A / R404A / R134a

Stock No.	Model	THR (watts @ 1 KTD)			Fan Qty / Dia.	Air Vol. (L/sec)	Dimension (mm)			Weight (Kg)
		R449A	R404A	R134a			L	W	H

**Notes:**

- Twin coil models are delivered Ex Australia
- Standard configuration is vertical airflow
- Maximum operating pressure 3650 kPa is suitable for R410A
- 3 phase fan option available
- EC fan option available

# Branch Locations

## North Island

### Auckland Branch

7 Lockhart Place, Mt Wellington,  
Auckland 1060  
**Phone:** 09 526 5700  
Email: sales@realcold.co.nz

### Hamilton

43 Lake Road, Frankton,  
Hamilton 3204  
**Phone:** 07 848 2111  
Email: hm@realcold.co.nz

### Hastings

Unit 2, 300 Victoria Street,  
Hastings 4122  
**Phone:** 06 870 3714  
Email: hbn@realcold.co.nz

### Wellington

54 Fitzherbert Street, Petone,  
Lower Hutt 5012  
**Phone:** 04 569 3072  
Email: wgn@realcold.co.nz

### North Harbour

Unit C, 28 Canaveral Drive,  
Albany 0632  
**Phone:** 09 477 0274  
Email: nh@realcold.co.nz

### Palmerston North

Unit 2, 597-599 Tremaine Avenue,  
Palmerston North 4442  
**Phone:** 06 357 9101  
Email: pn@realcold.co.nz

### Tauranga

5 Barberry Street, Judea,  
Tauranga 3110  
**Phone:** 07 571 0096  
Email: tga@realcold.co.nz

## South Island

### Christchurch

14 Cass Street, Sydenham,  
Christchurch 8023  
**Phone:** 03 338 8084  
Email: chch@realcold.co.nz

### Dunedin

86 Andersons Bay Road,  
Dunedin 9016  
**Phone:** 03 467 7106  
Email: dn@realcold.co.nz
